Fit Session (circle as appropriate)	1st	2nd	3rd				
1 Retained front bust volume from original pattern. Removed waistband neckline and reduced centre front width to create a smaller neckline and improve fit around chest and collarbone area. Smoothed shoulder/sleeve curve into a rounder shape. Sleeve length shorter by 2cm to improve proportion. Removed functional pockets; retained only decorative curved fake pocket details on front panel. Developed adjustable front and back waistbands to control hem volume and fullness. 2 Sleeve length shortened by 5cm. Added sleeve volume for movement: sleeve cut open from shoulder (near side seam) to elbow; +3.5 cm added at widest point. Added front and back waistbands for connection. Reduced front hem fullness using slash and overlap method to remove excess volume. Moved CF seam and hem volume seam upward to sit closer to the bust line for better proportion. Reduced CB neckline looseness: 1.5 cm removed from both sides of centre back. Adjusted neckline shape to create a more upward shape around the neck. Shortened back panel by 4 cm to reduce front and back length difference. INSERT FIT COMMENTS FOR EACH SESSION HERE (DUPLICATE THE PAGE FOR EACH FIT SESSION) SIGNED: _____

Construction Notes

Name: Sum Ho	Brand:	Style No. TAD-001-001
Block Reference:	Base Size: 10	Date: 30/05/2026

Cape Sewing Process

1. Press the waistband, sleeve tabs, and mark construction guidelines.
2. Construct the mock pockets on the front and back body panels. Join the back body panels, yokes, and front body panels using flat-felled seams.
3. Sew the pocket facing and pocket lining together, attach to the body panel, turn to the correct side, and secure with edge topstitching.
4. Join the body panels and pocket lining. Finish the pocket lining hem with a clean-edge finish.
5. Press seam allowances open and divide into left and right sections. Apply binding tape to both seam allowances, including the pocket lining edges.
6. Finish the front J-curve area with overlock stitching in advance, then construct the fly facing, fly guard, and zipper.
7. Join the centre front seam from the J-curve area up to the neckline using four-thread overlock finishing.
8. Join the upper and lower back panels, apply binding tape to the seam allowance, press seam allowances downward, and finish one side with binding.
9. Join sleeve side seams, press seam allowances toward the back, and finish edges with binding tape.
10. Sew front and back neckline facings together. Press side seams open and finish with four-thread overlock stitching. Overlock the facing hem, press seam allowances inward, and secure with edge topstitching.
11. Attach front and back facings to the neckline of the main body. Turn to the correct side and press into shape. As the front and back panels use different colours, change thread colour accordingly for topstitching.
12. Construct the sleeve tabs and apply double topstitching at 0.6 cm, matching the flat-felled seam detailing.
13. Construct the belt loops. Secure the upper half of the belt loops into the waistband between the layers, then attach the waistband to the main body. Complete waistband edge topstitching and secure the lower half of the belt loops.
14. Finish sleeve hems and garment hem using the turn-and-turn method with 0.8 cm topstitching.
15. Attach belt loops to the sleeves and secure the upper and lower edges with topstitching.
16. Stitch the lower 12 cm section of the sleeve opening to secure the cuff. Press seam allowances to both sides. Finish the back sleeve hem using the turn-and-turn method with 1.1 cm topstitching.
